DFuze

DFUZE ENHANCES INTELLIGENCE SHARING AND ANALYSIS TO HELP COMBAT TERRORISM.

Set to become the de facto standard in the fight against terrorism, the DFuze software system builds intelligence by bringing together disparate information and media into one user friendly portal. Terrorist intelligence held by a diverse range of law enforcement agencies is a valuable resource. DFuze provides a framework by which these agencies gather, store, build, retrieve, report and disseminate this intelligence.

DESIGNED WITH EXPERTS

DFuze has been designed in close consultation with IED/EOD experts. Rich in analysis, productivity, reporting and media features, DFuze helps intelligence professionals meet their best practice goals.

GATHER

DFuze enables agents to rapidly gather and store intelligence from multiple sources in various formats including video and images.

The DFuze Model

BUILD

Add value to gathered intelligence by linking elements to build a complete picture of the incident. Link any records such as Incident with Persons or Groups and link documents, images and video to records.

An integrated photo-edit module includes a comprehensive set of editing tools to enhance the quality of your pictures.

RETRIEVE

A diverse range of search engines will rapidly retrieve and show intelligence including Quick Search and Field Search. The Advanced Search will perform multiple searches across any DFuze data-set or field. All search results are displayed in a familiar Windows™ tree-view format and all retrieved records, documents, images and video are viewed directly from the DFuze application.

A powerful data-mining suite will search across all documents including word processor, email, database, spreadsheet, Unicode and ZIP for instances of text and all hits are highlighted and shown in context within a user friendly PDF or HTML report.

POWERFUL ANALYSIS

An impressive range of analysis and reporting facilities help maximize the potential of your intelligence. The Chart Reports feature automatically interrogates your data and produces pivot tables and charts to help identify trends in terrorist activity. In depth text and media reports detailing specific records and record links are generated automatically from your data.

SHARE

DFuze provides a framework allowing you to share your data with intelligence partners. Media rich intelligence can be shared from different locations over any network connection. Where a network connection is not available, individual records or groups of records and media can be extracted from DFuze and disseminated to other locations via email or recordable media. Internationally recognized and accepted Data Encryption methods are utilized to assure maximum security for all data exchanges.

Features

One Stop Shop
Store, link, retrieve, report and share all your intelligence data from one user friendly application.

Data Mining Tools
Search through any text based documents for keywords and phrases.

Media Rich
Store and view video, sound, images and documents.

Multi-Lingual
Translate field labels into any language.

Rapid Intelligence Retrieval
A combination of SQL Server technology and optimized networking ensures un-paralleled data retrieval.

Reference Library
A media rich library to store all common open source pictures and data.

Imaging
Range of powerful imaging tools.

Customizable
User definable field tags and reports to suit your needs

EASE OF USE

Intelligence records and search results are easily browsed through with a tree view navigator and all documents, images and videos associated with a record are clearly shown.

SCALABLE

From a stand-alone system through to a full scale enterprise deployment, DFuze will accommodate your requirements.

BACK UP

Create a secure, encrypted data-dump to back-up all of the information held on DFuze.

CUSTOMIZATION

Menus and Data Field labels can be easily converted into any language supported by the Microsoft Operating System. DFuze currently supports English, Spanish, French and Arabic translations. Intelligence reports can be customized before production and are easily exported to word processing packages.

Benefits

Greater Insights
Through advanced techniques DFuze will help your intelligence team gain greater insights into complex situations.

High Productivity
Realize efficient and productive work with intelligence collation, reporting and dissemination, powerful imaging, media playback and document management facilities all just a few clicks away.

Improved Sharing
Share intelligence between departments and with other national or international agencies.

XPECT SOFTWARE
